The Next Generation of Power – TWIN JET MAX FINS

Discover the power of the new 2007 Twin Jet Max split fin by SCUBAPRO, to be launched in spring 2007. With these and all other products, SCUBAPRO engineers have taken fit, comfort and performance variables into consideration to develop the world's finest line of dive gear.

The Twin Jet Max Fin features the **Patented Split-Hydrofoil shape** to deliver optimum power with minimum effort, plus the **Dual-Compound Construction** which blends the best characteristics of two different yet compatible compounds to achieve the highest level of performance. This patented split fin technology has been proven to deliver more forward motion with considerably less effort than any other traditional blades. The renowned **Patented Drag-reducing vents** substantially decrease resistance on both up and down strokes. The soft vented foot pocket is bio-engineered for maximum comfort and optimum fit while seamlessly transferring energy from the diver to the fin. The Quick-connect swivel buckles with quick-adjust straps ensure easy adjustment and use.

The fins are also guaranteed by our Limited Lifetime Warranty*.

Available NOW !!

Part Number :

- 25.345.x00 Twin Jet Max Fins – Graphite
- 25.346.x00 Twin Jet Max Fins – Red
